

dgmCompare Broadband II

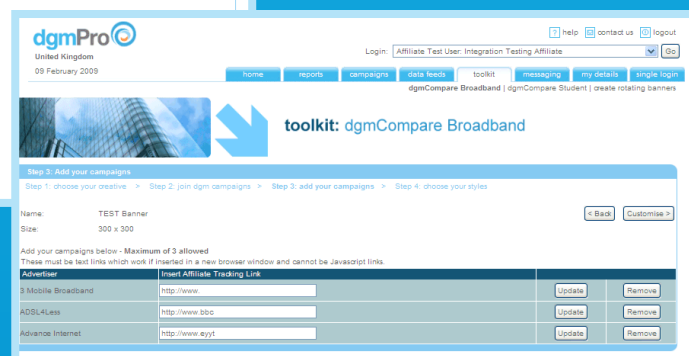

The no mess, no fuss tool from the telecoms market specialist

dgmCompare Broadband is an aggregated broadband comparison checker that has been devised and built by dealgroupmedia UK Ltd, the telecoms specialist. It is the first time an affiliate network has brokered an exclusive deal and in doing so been able to act as a content provider adding value back to the affiliate marketplace.

dgmCompare Broadband allows any affiliate to provide a comprehensive broadband referral service in one content unit, using customisable artwork. Choose from a selection of sizes and colours all available directly from your dgmPro account.

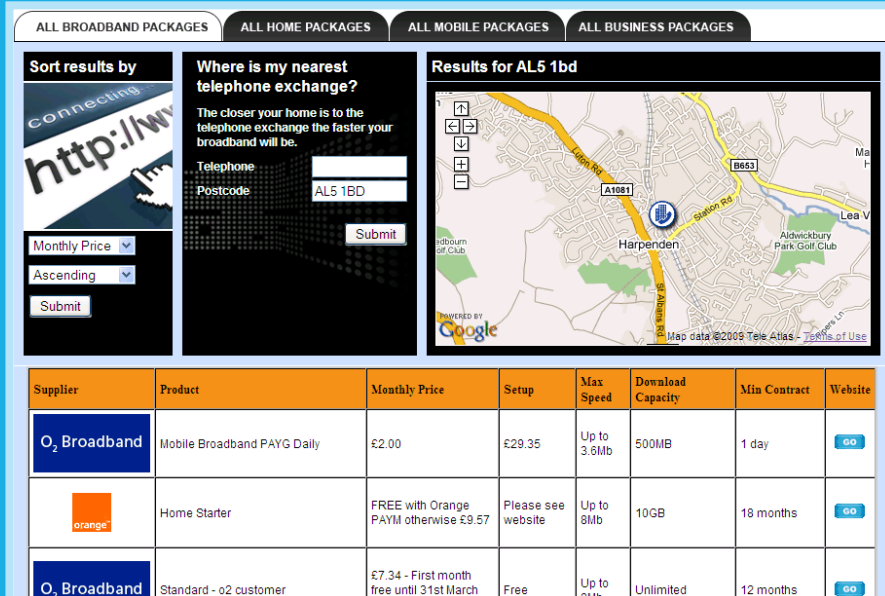

Features

- Ready to use broadband tool for any website
- Available within the dgmPro toolkit
- Separate Domestic, Business and Mobile categories giving relevant results
- Results table opens in new browser from the artwork you choose
- Sortable results table
- Fully customisable colour palette to match your site
- Choose from a range of size templates, text links or 'complete page' iframe
- Automatically updates all current versions in situ
- Results map showing distance to local exchange
- Results include monthly price, Setup fee, Max Speed, Download Capacity, Contract terms
- Add your own merchants

dgmCompare Broadband II

dgm 
your online marketing company
